Fund A Cure

AN OPPORTUNITY TO REVOLUTIONIZE THE LIVES OF OUR LOVED ONES WITH DIABETES

100% of the donation goes to research, this year towards the advancement of the Artificial Pancreas Project

100% of your donation is tax deductible

JDRF's Artificial Pancreas Project stands on the cusp of a breakthrough that represents the first step toward dramatically improving the lives of millions of people with diabetes: an artificial pancreas, an automated system to disperse insulin based on real-time changes in blood sugar levels.

The Artificial Pancreas is a “closed-loop” device that would regulate glucose levels in the body of someone with diabetes by continuously measuring the level of glucose and dispensing doses of insulin based on those measurements. The Artificial Pancreas will link an insulin pump to a continuous glucose monitor, providing the right amount of insulin at the right time, just as the pancreas does in people without diabetes.

The Artificial Pancreas has the potential to revolutionize diabetes care and management, significantly improving the ability of people with diabetes to maintain strict blood glucose control, and as a direct result, reduce the chances of developing complications like kidney disease, heart attacks, stroke and blindness.

Giving people with diabetes the opportunity to think less about the disease while better managing blood sugar levels and reducing the risk of complications – Now that’s revolutionary.

After the Live Auction you will be asked to participate in Fund A Cure. This is your opportunity to make a donation that goes 100% directly to research and is 100% tax deductible. During Fund A Cure, the auctioneer will call out various contribution levels. When you hear the level you wish to support, raise your bid card and hold it in the air until the auctioneer calls out your number. You will also be able to donate to Fund A Cure on the electronic bidding device you will receive at registration.

If you believe in the power and promise of research, please make a Fund A Cure donation and you will be funding the science to make the Artificial Pancreas a reality.

For more information about the Artificial Pancreas, visit www.artificialpancreasproject.com
